## **NORBORD CHOOSES MINIFOG SYSTEM FOR PRESS PROTECTION AT CORDELE**

December 2010 - Norbord Inc. has determined that after more than a decade of successful Press Fire Protection on their continues presses located in South Carolina and Alabama to incorporate the Minifog PressProtect water mist fire protection system to protect the Multi-Daylight press located in Cordele, GA.

The Minifog PressProtect water mist system is Factory Mutual approved for protection of continues presses and is a proven fire protection system for Multi-daylight presses by FM, VdS and other recognized testing laboratories.

Flamex, Inc. and their Minifog PressProtect water mist system currently protects over 200 presses worldwide including 8 multi-daylight presses in North America.

In addition to the Minifog PressProtect system, Flamex, Inc. offers a wide array of special hazard fire protection systems including the widely recognized Spark Detection and Extinguishing System.
